

City of Coral Gables Commissioner Patricia Keon, in partnership with Florida International University Sea Level Solutions Center hosts:

A Sea Level Rise Discussion Series

Free to the public

Learn from experts about the potential impacts of sea level rise in the community, review potential adaptation and mitigation strategies, discuss public policy implications of sustainable development, and much more!

Sea Level Solutions Center Interdisciplinary Studio: Climate Responsive Design for Resilient Natural-Built Infrastructure
Wednesday, April 13, 2016, 6-7 p.m.
Coral Gables Museum, 285 Aragon Avenue

FIU graduate students will bridge knowledge and expertise from a range of disciplines including Architecture and the Arts, Engineering and Computer Sciences, Biology, Law, and Public Health, to design resilient and sustainable infrastructure for the future. The studio will culminate in a showcase of student work, with information and analyses for each adaptation and mitigation solution.
