During Fiscal Year 2016-2017, the City implemented a Sea Level Rise Program for its Storm Water Utility System. The plan implements modest annual fee increases that will generate \$100M (present value dollars) by the year 2040 to help fund future infrastructure hardening improvements. During each fiscal year the funds generated by the fee increase will be accumulated and set aside as restricted funds until the \$100M goal is reached; or utilized sooner if a more immediate sea level rise storm water mitigation need occurs. (See below for FY25 Fee change)
